Proactive Accessory Program

Avoid Unscheduled Outages with Score Energy

Score Energy's Proactive Accessory Program (PAP) offers:

- Complete Portfolio of Repair Capability
- Fully-Stocked Component Inventory
- Rotable (Exchange) Accessories Available
- Pre-Positioning of Off-Engine Accessories

Gas turbine accessories...especially off-engine accessories, are often forgotten and frequently not maintained. While the "flange to flange" aspect of a gas turbine typically receives proactive and rather expensive maintenance, mission critical accessories are left untouched until failure occurs.

Score Energy's Proactive Accessory Program is designed to provide a set of fully refurbished engine accessories, available for installation at the engine site with no impact on scheduled outage time. Whether a lease engine or a spare engine is to be installed, our PAP package will be on-hand for installation of the accessories. When the original engine returns from the overhaul facility, no further action on the accessories is necessary, the refurbished engine accessories will remain on-site for continued use until the next scheduled major engine overhaul.

Product Range

Score Energy is a full service, full product-line fuel and Accessories provider

- Over 50,000+ GE/LM SAC and DLE Fuel Nozzles repaired, refurbished & tested
- Accessory workscope expanded for full-line capability, including flow test & fuel metering valve DLE profiling
- Services expanded to include exchange units & lease-engine support

*Fuel Metering Valves - Fuel Shut-off Valves - VG Controls - Hydraulic Control Units - Sprint Spray Nozzles
DLE Bleed Valves - Fuel Staging Valves - Starters - Pumps*
