

Compression Fittings & Tube Bending

This one-day training course covers aspects of tube bending methods, and common tube compression fittings.

Mechanical Technicians/ Engineers, Maintenance Technicians/ Engineers, Instrument Technicians/ Engineers, Engineering Apprentices and Trainees, Graduate Engineers, and Pipe Fitters should attend this course.

Learning

60% Practical (Workshop based)

40% Theory (Classroom based)

Skills you will learn

- Tube bending and the fitting used in the instrumentation process
- Basic design principles of each fitting type and where they can be used
- Common thread forms on compression fitting types
- How compression fittings are correctly assembled
- Conduction of basic tube bending operations
- How to carry out inspection and identify common defects
- Identify potential problems that may cause loss of production or situations with safety implementations
