

General Valves

The General Valves training course is delivered over 5 days, offering in-depth information on the most common valve and operator types, in terms of function and application. This intense training programme would be extremely beneficial for Mechanical Technicians/ Engineers, Instrument Technicians/ Engineers, Maintenance Technicians/ Engineers, Process Operators, Responsible Department Leaders, Site Managers, Project Engineers, engineering Apprentices and Trainees, and Graduate Engineers.

Learning

40% Practical (Workshop based)

60% Theory (Classroom based)

A combination of group and individual exercises, case studies and hands-on problem solving

Skills you will learn

- Basic valve types
- To visually identify valves by type
- How valves work and the functions they carry out
- The numerous types of media they can be used on, and the advantages of each
- Common defects
- Health, safety and environmental risks which may arise resulting in loss of production

Course Agenda

Day 1	Day 2	Day 3	Day 4	Day 5
Introduction	Ball Valves	Globe Valves	Butterfly Valves	Actuators
Course Objectives	Check Valves	Control Valves	Plug Valves	Gears
Pressure Forces	Needle Valves	Choke Valves		Maintenance
Pressure Envelope		Gate Valves		Consolidation of course
Pressure Safety Valves				
Bellows Sealed Valves
