Engineering Courses

Non-Invasive Maintenance

This one-day training programme has been designed to give initial information on all valve types and their function in a theoretical format.
This course would be valuable for Mechanical Technicians/ Engineers, Maintenance Technicians/ Engineers, Engineering Apprentices and Trainees, and Graduate Engineers.

Learning

80% Theory (Classroom based)

Skills you will learn

- What non-invasive maintenance is, and identify when non-invasive becomes invasive
- Different valve types and their basic design function
- How to carry out safe working practice with regards to non-invasive maintenance routines for specific valve types and associated equipment
- Health, safety and environmental risks which may arise resulting in loss of production
