Engineering Courses

Pressure Safety Valves

This three-day training course focuses on PSV certification, and should be attended by Mechanical Technicians/Engineers, Maintenance Technicians, Engineering Apprentices and Trainees, and Graduate Engineers.

Learning

70% Practical (Workshop based)
30% Theory (Classroom based)

Skills you will learn

- Different Pressure Safety Valves types and associated equipment
- Basic design, function and the calibration process of various valve types
- How to dismantle, inspect, and reassemble equipment to set procedures
- How to perform pressure testing to ensure the various equipment has met the correct standard
- Identify standards relating to Pressure Safety Valves
- Health, safety and environmental risks which may arise resulting in loss of production
