

Sealant Injection

This stimulating one-day course provides an introduction to different areas of sealant injection on valves.

The course could be attended by Mechanical Technicians/ Engineers, Maintenance Technicians/ Engineers, Engineering Apprentices and Trainees, and Graduate Engineers.

Learning

50% Practical (Workshop based)

50% Theory (Classroom based)

Skills you will learn

- Basic valve types that may benefit from sealant and grease injection
- State the various types of sealant media used, and the advantages of each
- The sealant/grease injection process
- How to inject sealant/grease safely in to equipment
- Identify the different types of equipment used and how to inspect it
- State common defects
- Identify potential problems that may cause loss of production or situations with safety implementations
